

Honematic Machine Corporation

Good Morning David,

I just wanted to thank you and your technical, quality and production team for once again assisting Honematic Machine in a project that others had told us couldn't be done.

Your company's ability to work closely with our staff at Honematic, sharing your expertise with our engineering and production personnel, has allowed us to offer our customers an extremely high level of consistent quality on some of the most demanding projects in our facility.

We continue to enjoy our partnering experience with Dav-Tech Plating and we appreciate the many opportunities we have been allowed to avail ourselves of your expertise, even in areas outside your particular finishing offerings.

Honematic looks forward to continuing this strong working relationship with Dav-Tech, a company committed to quality, service and dedication to its customers.

Best Regards,

Joseph J. Cusimano
President
