

## **Precision Manufacturing Technologies**

Writing a letter of recommendation for Dav-Tech is easy.

My tenure here at Producto has provided me with a ten year time line from which to observe the ongoing relationship between our two companies. For that period of time, I can personally attest to the high quality of service that Dav-Tech has provided to us.

We supply sophisticated finished parts to Dav-Tech for plating. They range in size from hand-held to something akin to a large desktop. Virtually all have in-process values measured in the thousands of dollars. In our business, none of these parts are for stock or inventory - all await immediate assembly for shipment as soon as your process is finished and they are returned to us for inspection.

Dav-Tech has historically provided and continues to provide the best service in their industry for Producto. Delivery is fast and reliable. Performance is accurate and consistent. Pricing has always been competitive. The rare occurrence of customer service issues has been handled promptly on site here and by individuals who have the ability to enforce and expedite resolutions. Technical questions about plating have been forwarded to Dav-Tech and have resulted in timely and helpful responses.

Dav-Tech provides a level of service to Producto that allows us to successfully compete in tough markets. Your efforts to maintain a manually profitable relationship are of substantial benefit to us.

Simply, we're glad you're there.

Regards,

Frank F. Shaw  
Branch Manager
